## Lessons, Lab Experiments & More

### Lessons

ScienceFlix provides hundreds of science-based lessons for students of all ages. Each lesson includes:

- a video,
- an article,
- related web resources,
- a lab,
- comprehension questions,
- a quiz,
- and career information

ScienceFlix gives you lessons on many different topics like:

- Space, Earth, Physical & Life Science
- Health & Human body
- Technology, Math, & Engineering

### Lab Experiments

ScienceFlix gives you directions on how to conduct your own lab experiments at home! Did you ever wonder if you can cook something using the sun? Well, now you can! You can perform fun and exciting experiments relating to different fields of science.

### Science News

Science News provides reports on different news topics that are important to the scientific

community. Learn about exciting upcoming or current events that relate to the world we live in. ScienceNews covers topics like weather, climate, space adventures, animal species, and more.

Keep up to date with what is happening in the world with these exciting and informative science news stories.

#### *Cooking with the Sun Lab Experiment*

*Hypothesis: How can a homemade cardboard oven be powerful enough to cook something such as s'mores? What makes you think this?*

*How might changing the materials that you use in making your oven change the results? Why?*

*Find out the answer by conducting the experiment yourself!*
